

# Index

Introduction..... 1

## Chap. 1

1.1 Liquid crystals: general properties.....	9
1.2 Order parameter in NLC.....	15
1.3 Electric field effect in NLC.....	17
1.4 Continuum theory and elasticity in nematics.....	19
1.5 Frederiks effect.....	21
1.6 Electric conductivity in nematic liquid crystals.....	24
1.7 Optical properties in NLC.....	25
1.8 Ferroelectricity in liquid crystals.....	29
References.....	32

## Chap. 2

2.1 Asymmetrical liquid crystals cell.....	33
2.2 Tungsten trioxide.....	35
2.3 Sol-gel thecnique.....	38
2.4 Titania/Vanadia thin film: sol-gel synthesis.....	39

2.5 Raman measurement	
On titania/vanadia.....	41
2.6 Electrical properties	
of titania/vanadia.....	47
2.7 Electrooptic characterization of LC	
cells containing titania/vanadia.....	52
2.8 Bismuto-Vanadia thin film:	
sol-gel synthesis.....	59
2.9 Raman measurement on	
Bismuth-Vanadia.....	60
2.10 Electrooptical characterization of LC	
cells containing Bismuth-Vanadia.....	64
2.11 Qualitatives interpretations.....	68
References.....	71

### **Chap.3**

3.1 Liquid crystals cells assembling and	
electrooptical observation.....	73
3.2 Impedance measurements.....	75
3.3 Calorimetry.....	79
3.4 Raman spectroscopy.....	82
Reference.....	94

### **Chap.4**

4.1 Preface.....	95
------------------	----

4.2 Sol-gel synthesis of WO <sub>3</sub> .....	96
4.3 Raman spectroscopy.....	96
4.4 Electrooptical response.....	99
4.5 Impedance spectroscopy.....	102
4.6 Theoretical model.....	104
references.....	127

## **Chap. 5**

5.1 Preface.....	129
5.2 Sol-gel synthesis.....	130
5.3 Conductivity on PZT films and calorimetric characterization.....	134
5.4 Electro-optical response.....	146
5.5 Conclusions.....	148
References.....	150
